FOR IMMEDIATE RELEASE

Pure Water Technology Expands Regional Operations

New 24,000-square-foot facility will elevate innovation, operational efficiency, and customer service.

Lancaster, PA, August 11, 2025 – Pure Water Technology, a leading provider of workplace water purification and ice solutions, is thrilled to announce its new Lancaster, Pennsylvania facility and expansion of its operations. The company's growing customer base across Pennsylvania, Maryland, New Jersey, and Delaware will benefit from this initiative as it will enhance Pure Water Technology's already renowned customer support, product availability, delivery efficiency, and responsive service.

Pure Water Technology has made a significant investment in the new 24,000-square-foot facility at 1140 Corporate Blvd, Lancaster, PA 19601. The facility houses a 5,000-square-foot office space, a 3,000-square-foot production area dedicated to reconditioning and testing water purification systems, and a 16,000-square-foot warehouse equipped with two docks to optimize inventory management.

"We're excited about how our new building will enable us to do more for our existing clients and serve more customers. It will significantly streamline our workflows, increase our production capacity, and boost our distribution efficiency," said John Burkholder, Pure Water Technology's owner and president. "It's all about providing our customers with the most exceptional service possible. We look forward to leveraging our new facility to strengthen our long-standing focus on innovation and customer satisfaction."

Pure Water Technology, one of the few companies providing "point of use" water purification systems and ice makers exclusively to commercial clients in its four-state region, the new facility is now open. For more information about the company and its range of products and services designed to meet businesses' unique water purification and ice needs, visit the Pure Water Technology website: purewaterpa.com.
